

# Somerset *Art* & Science Summer Camps

Two summer sessions to keep you occupied and learning!

Discover a love for the intersection of the sciences and arts at one or both summer sessions. This year's themes are A Creative Look At Ecology and Engineering With Art. Students will learn about ecosystems, anatomy, mathematics, and stability through the mediums of painting, drawing, sculpture, collage, and writing. Sign up for just one session, or sign up for both. Let us know if you'll be joining! Each session is five days long, and each day runs from noon to 3pm.

Sessions will be held in the Somerset neighborhood, meeting at the house of Vincent and Dawn Wang. See sign-up sheet below for more details. Whitney Goller is a professional artist who teaches at East Tennessee State University and Tusculum College. This camp is for participants of 12 or older.
